About Me

Fresh graduate in Information Technology with internship experience as a Front-End Engineer and Software Engineer at two different companies. Proficient in developing modern digital applications using React.js, Next.js, Vue.js, TypeScript, Tailwind CSS, Laravel, and REST APIs, with a focus on performance, user experience, and scalable development. Accustomed to working collaboratively in teams and quickly adapting to technology and digital product development needs.

Experience

Field Work Practice at PT Agrinas Pangan Nusantara April 21 - June 30, 2025

- Participated in the development of an operational inspection and reporting application using Laravel Inertia and React.
- Developed dashboards, scheduling, reporting, and report export features using React and Inertia.
 - Built interactive forms, data filtering, and responsive UI using Tailwind CSS.
 - Implemented mobile camera-based report upload and multipart form handling features.
 - Developed role-based UI, reusable components, and interactive dashboards to enhance user experience.

Professional Internship at PT Nose Herbalindo October 23 - Present, 2026

- Participated in the development of a financial and economic news platform to deliver real-time market information and latest news updates.
- Developed and optimized front-end features using React.js and TypeScript.
 - Implemented multi-language, real-time translation, and personalization features.
 - Optimized data fetching and caching using TanStack React Query to improve application performance.
 - Developed analytics tracking, user interaction features, and SEO optimization for the platform.
